TECHNICAL SKILLS

Python · C · Mathematical modelling · Numerical simulation · Electronics · Lab work

LANGUAGES

Wolof	Native
French	Fluent
English	Advanced
Spanish	Intermediate

STRENGTHS

- Resilience
- Rigour: I understand a problem's structure before solving it
- Adaptability
- Inclusive team spirit
- Initiative

INTERESTS

- Space exploration: following missions and launches
- Basketball
- Programming

First-year engineering student at ENSEEIHT and the first in my family to join a top engineering school. Resilient and driven, I take the time to understand the structure of a system before solving it. My goal: to design space systems within a national or international space agency.

EDUCATION

Engineering degree – Electronics, Electrical Energy & Automation (3EA) — 2026 – present
ENSEEIHT, Toulouse INP · Toulouse, France

- 1st year: electronics, electrical engineering, control systems, programming
- Hands-on lab sessions (TP) in electronics

Preparatory classes for engineering schools (CPGE) – MPSI then MP — 2024 – 2026
CPGE de Thiès · Thiès, Senegal

- Two intensive years of mathematics, physics and computer science
- Competitive entrance exams to French engineering schools

Baccalaureate S1 (Mathematics & Physics) – Highest honours — 2024
Senegal

PROJECTS

TIPE – Thermoregulation of the human body — 2025 – 2026
Research project, CPGE de Thiès

- Built a mathematical model of the evolution of body temperature
- Wrote a program that simulates the model and plots the temperature curves

Engineering project (BE) – Snake game in C — 2026
ENSEEIHT

- Programmed the iconic Snake game in C: game logic, data structures, memory management

LEADERSHIP & ENGAGEMENT

Head of the Social Committee – REACT — 2026
Alumni association of the Thiès preparatory classes

- Ensure members' well-being and cohesion within the network
- Listen to and support members facing needs or difficulties
- Lead solidarity, mutual-aid and social-awareness actions

Climate Fresk (Fresque du Climat) — 2026
Collaborative workshop

- Gained a solid understanding of the causes and consequences of climate change
